

# CONNECT YOUR CUSTOMERS TO THE #1 SMALL BUSINESS MARKETING SOFTWARE:

Integrate with Constant Contact

When you want to add value to your product and more revenue and customers to your bottom line, integrating with Constant Contact's AppConnect program should be a top priority for your business.

## You'll partner with a trusted brand.

Don't spend critical time and resources developing, debugging and maintaining your own proprietary email service. Integrate with Constant Contact and leverage our leading technology within your software or app.

## Your customers will love you even more.

Our complete suite of email, mobile, event management, and social media tools are a one-stop shop for your customers to do their marketing fast. They can capture, update and sync leads, get real-time reports, share data, and engage socially in one place. And with access to local seminars and award winning support, they'll do their marketing right, too. They'll see amazing results. You'll get all the credit.

## We'll help you spread the word.

Your software will be posted in our online app and integrations Marketplace. Our dedicated

partner marketing team can promote your software through numerous opportunities such as sales enablement tools, joint webinars, product demos, email marketing, press releases, and more.

## Here's why your technology team will like our AppConnect program:

- 1 Our technology and APIs support industry standards including REST, JSON, and OAuth 2.0.
- 2 They can get API keys, sample calls and code, documentation, and more via our developer portal at [developer.constantcontact.com](http://developer.constantcontact.com).
- 3 We offer APIs for contacts and list management, email creation and scheduling, and bulk activities.
- 4 SDKs are available in the portal for PHP, Java, iOS, Ruby, and .Net.
- 5 We have FREE developer support through our online forum and dedicated API support team.

Industry-leading technology, exposure to new prospects, and unparalleled developer support. All from one trusted integration partner: Constant Contact.
